Table S1. Steps of the inertization and copolymerization reactions in the automated synthesizer

Step	Macro task	Task	Description
1	Inertization of the reactors		
Loop 3 times	1.1	Set drawer valve	Set reaction block state to closed under inert gas
	1.2	Heat/cool	Thermostat on, pressure block (45 °C)
	1.3	Wait	Waiting for 5 minutes
	1.4	Set vacuum	Vacuum on (zone reactors)
	1.5	Set drawer valve	Set reaction block state to closed under vacuum
	1.6	Wait	Waiting for 1 minute
	1.7	Set vacuum	Vacuum off (zone reactors)
	1.8	Heat/cool	Thermostat on, pressure block (0 °C)
	1.9	Set drawer valve	Set reaction block state to open under inert gas
	1.10	Wait	Waiting for 15 minutes
2	Inertization of reaction solution		
Loop 3 times	2.1	Set drawer valve	Set the reaction block state to closed under pressure (1.1 MPa)
	2.2	Wait	Waiting for 20 seconds

	2.3	Set drawer valve	Set the reaction block state to open under inert gas
3	Polymerization reaction		
	2.4	Set drawer valve	Set the reaction block state to closed under pressure (1.1 MPa)
		Heat/cool	Thermostat on, pressure block (115 °C)
	2.5	Waiting for "reaction time"	
	2.6	Heat/cool	Thermostat on, pressure block (20 °C)
	2.7	Set drawer valve	Set the reaction block state to open under inert gas
		Heat/cool	Thermostat off
