Supplementary Figure Captions

Figure S1. TG curves of lignin pyrolysis with different heating rates (10, 15, 20, 25 °C/min). (UN-L, lignin isolated from untreated corn stover. EH-L, lignin isolated from enzymatic hydrolyzed residue of H-AFEX-treated corn stover)

Figure S2. DTG curves of lignin pyrolysis with different heating rates (10, 15, 20, 25 °C/min). (UN-L, lignin isolated from untreated corn stover. EH-L, lignin isolated from enzymatic hydrolyzed residue of H-AFEX-treated corn stover)
