# 1. Results and discussion

## 1.1 Synthesis and characterization of SFPL

**Fig. S1.** Influences of synthetic conditions of (a) the amount of PEI, (b) the amount of formaldehyde, (c) reaction temperature on the N content of SFPL, and (d) the amount of CS<sub>2</sub> on the S content of SFPL.

**Fig. S2.** Form factor distribution of the pores of SFPL determined by ImageJ 1.48v from 50 pores in the SEM image.
