

## Supporting Information

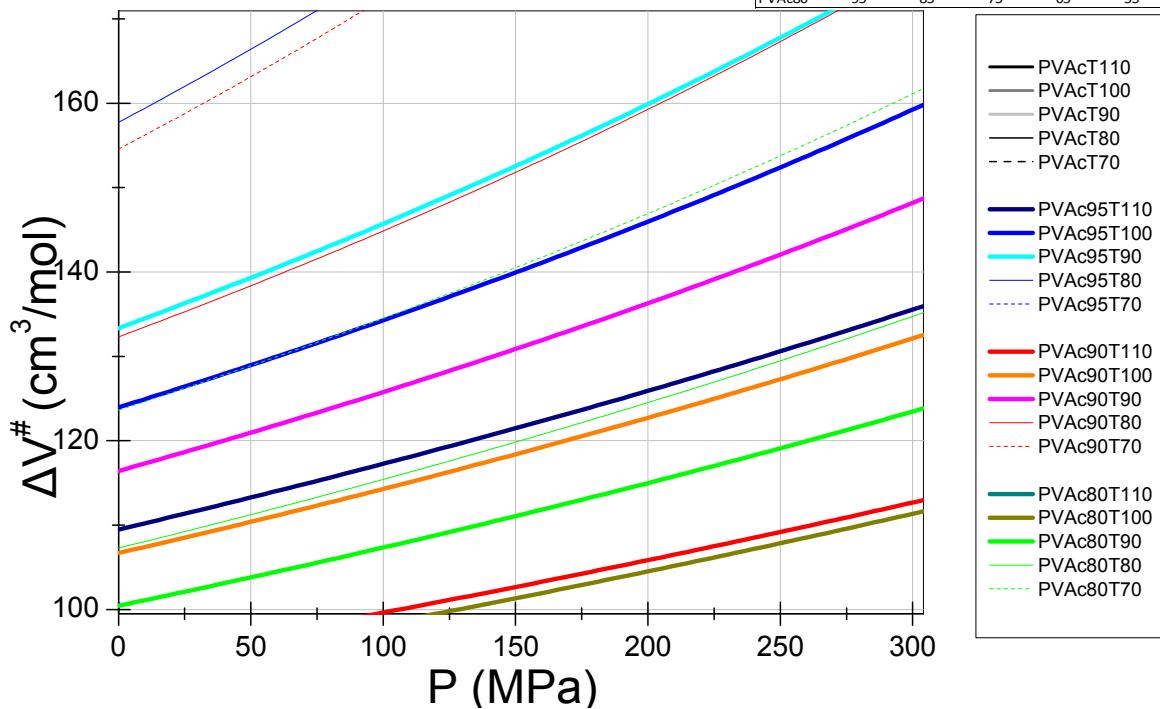

### Pressure effects on the Dynamic Heterogeneity of Miscible Poly(vinyl acetate)/Poly(ethylene oxide) Blends

George Zardalidis and George Floudas

**Figure S1.** Effective dielectric strength of the PVAc homopolymer (circles) and of the PVAC/PEO blends with  $\phi_{\text{PVAc}}=0.95$  (squares), 0.9 (up triangles) and 0.8 (down triangles). Notice the strong temperature dependence that reflects the changing specific interactions.

T (°C)	T-Tg				
	110	100	90	80	70
PVAc	71	61	51	41	31
PVAc95	74,4	64,4	54,4	44,4	34,4
PVAc90	80,3	70,3	60,3	50,3	40,3
PVAc80	95	85	75	65	55

**Figure S2.** Comparison of the apparent activation volume for the PVAc homopolymer and the blends with  $\varphi_{\text{PVAc}}=0.95, 0.90$  and  $0.80$  plotted as a function of pressure for different temperatures as indicated. The solid lines are fits according to eq. 10.
