Cartesian Coordinates of all optimized geometries Page S9~S22

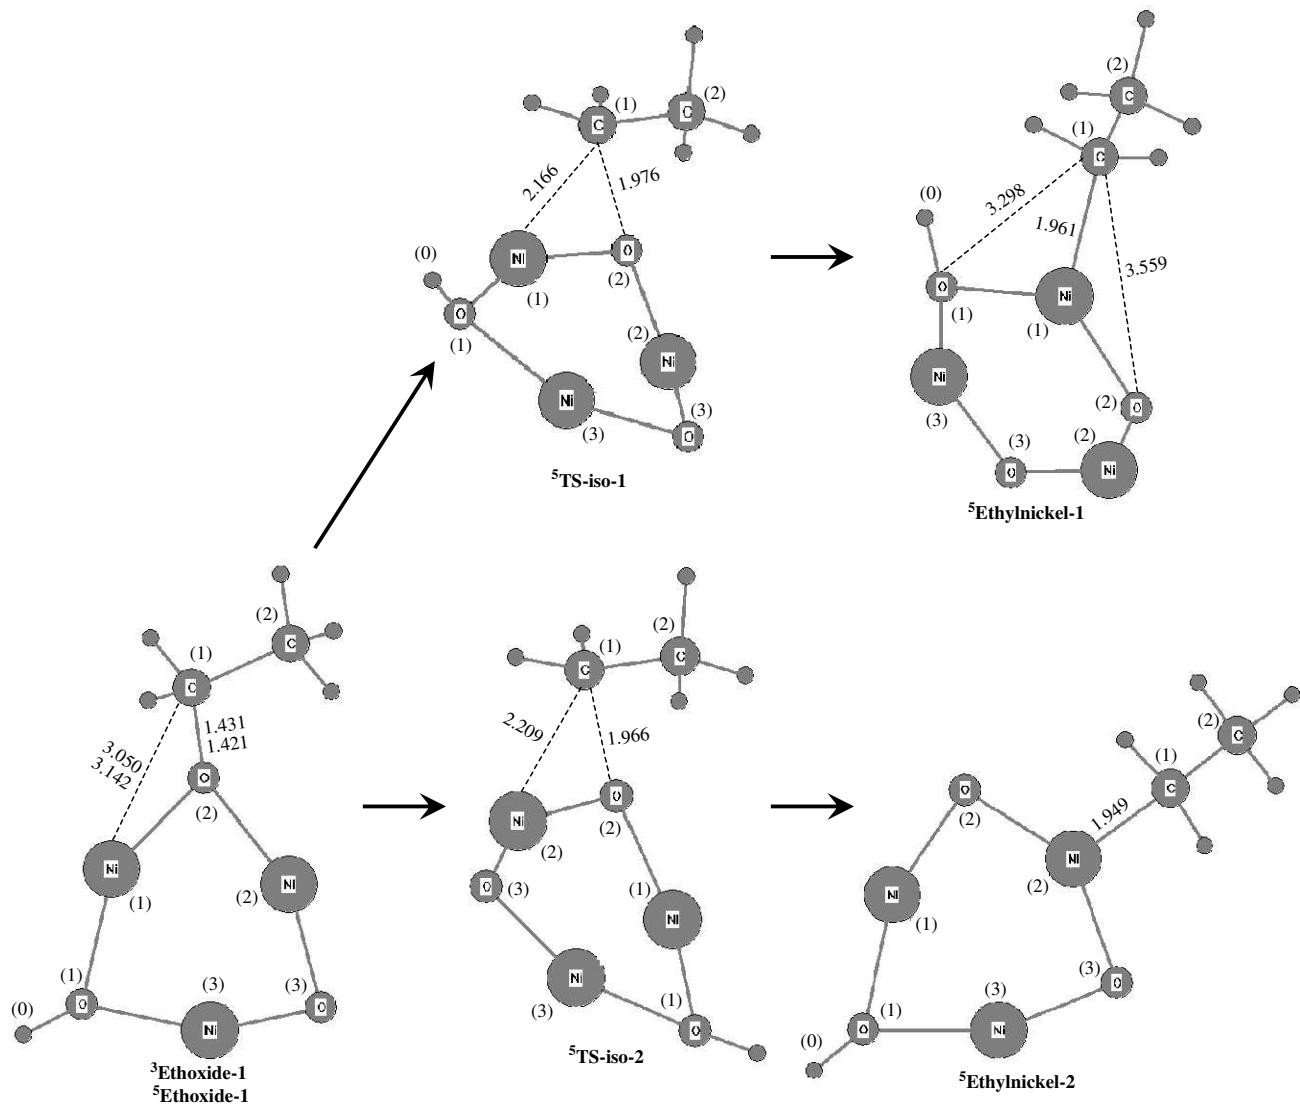

Figure 1S. Optimized geometries for the reactant, transition state and product for the isomerization of **Ethoxide-1** to **Ethylnickel-2**. Key distances are indicated in Å. The upper-left number of the name of each structure is the spin multiplicity. See Scheme 1d as well.

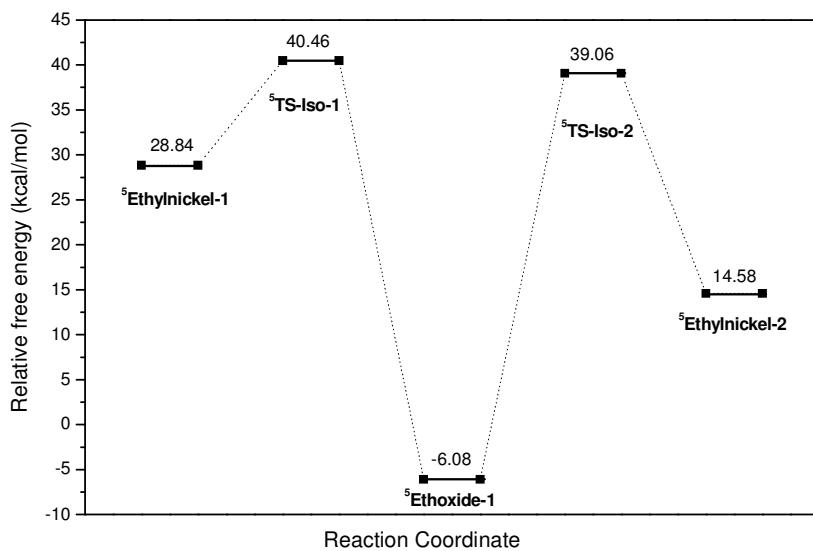

Figure 2S. Relative free energy (at 873.15 K) profiles for the isomerization of **Ethoxide-1** to **Ethylnickel-1** and **Ethylnickel-2**. The free energy of heptet $\text{Ni}_3\text{O}_3 + \text{C}_2\text{H}_6$ is the reference. See Figure 1S and Scheme 1d in the manuscript for detail

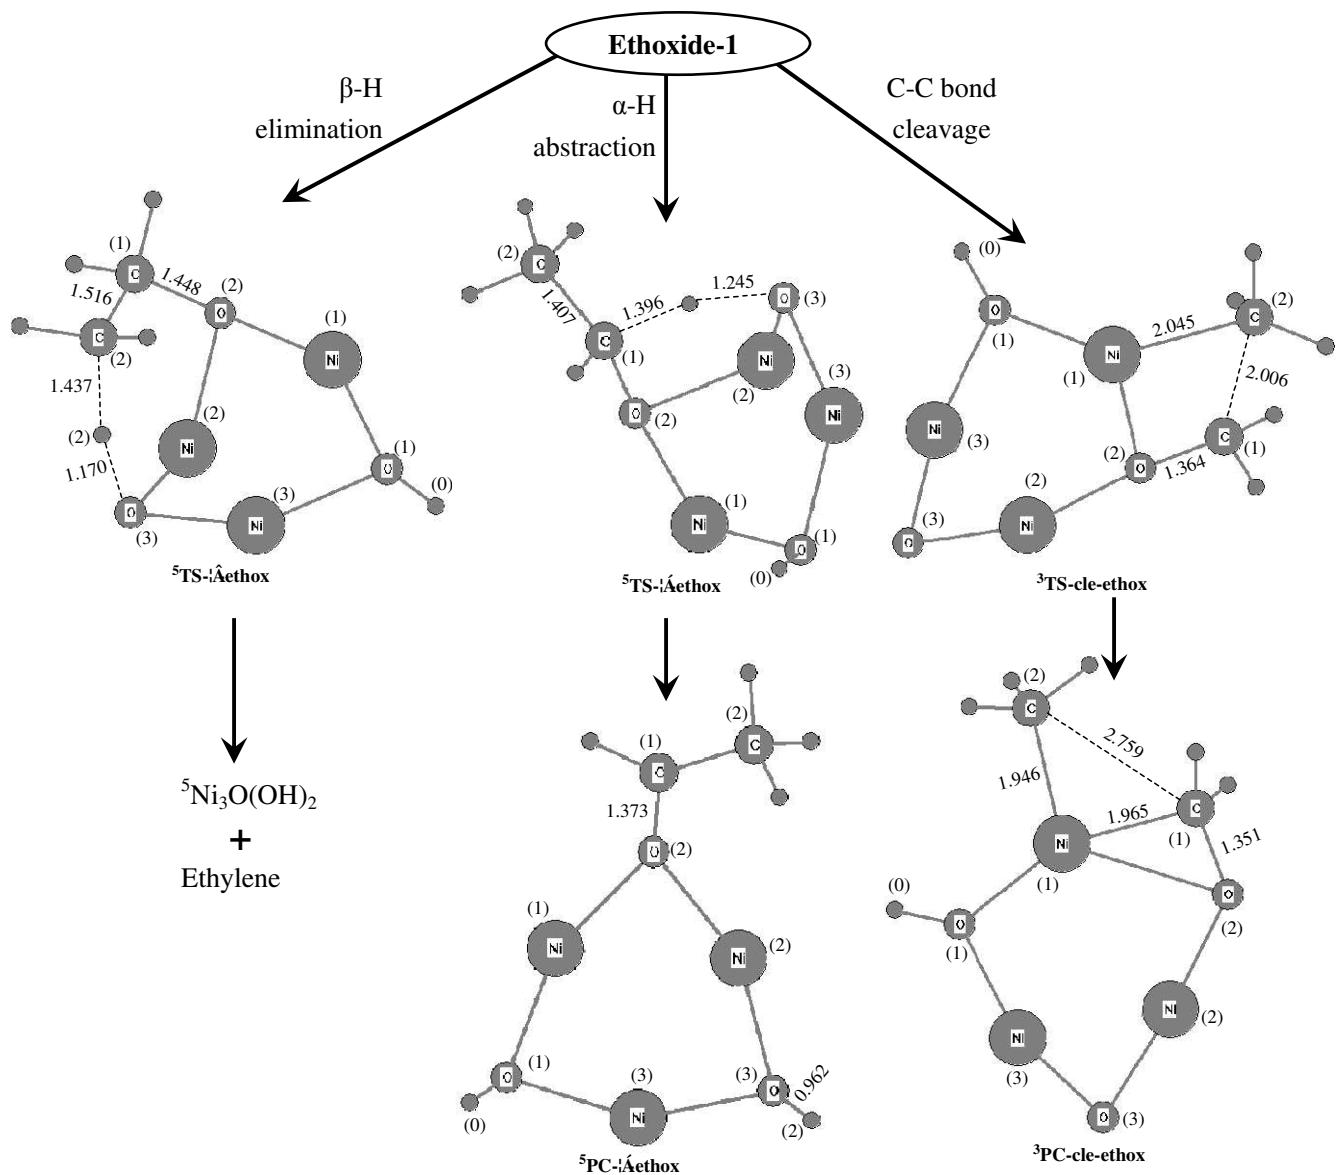

Figure 3S. Optimized geometries for the transition states and products for three reaction pathways of **Ethoxide-1** as indicated in the figure. Key distances are indicated in Å. The upper-left number of the name of each structure is the spin multiplicity. See the structure of ${}^5\text{Ni}_3\text{O(OH)}_2$ in Figure 4.

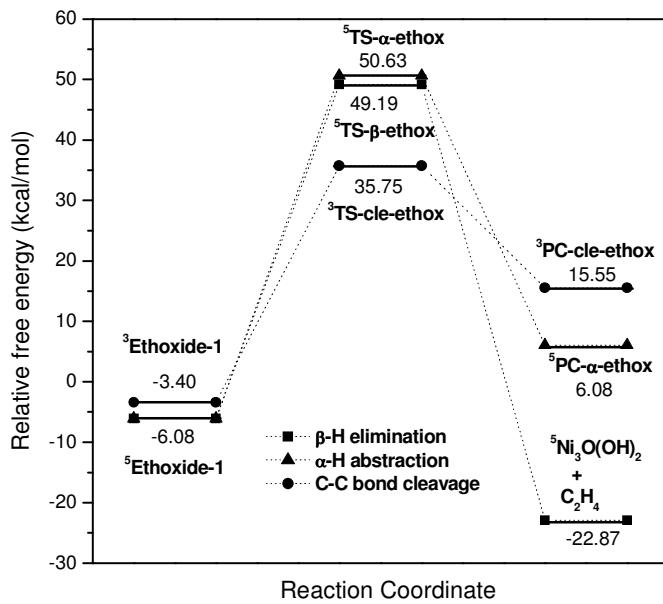

Figure 4S. Relative free energy (at 873.15 K) profiles for three reaction pathways of **Ethoxide-1** as indicated in the figure. The free energy of heptet $\text{Ni}_3\text{O}_3 + \text{C}_2\text{H}_6$ is the reference.

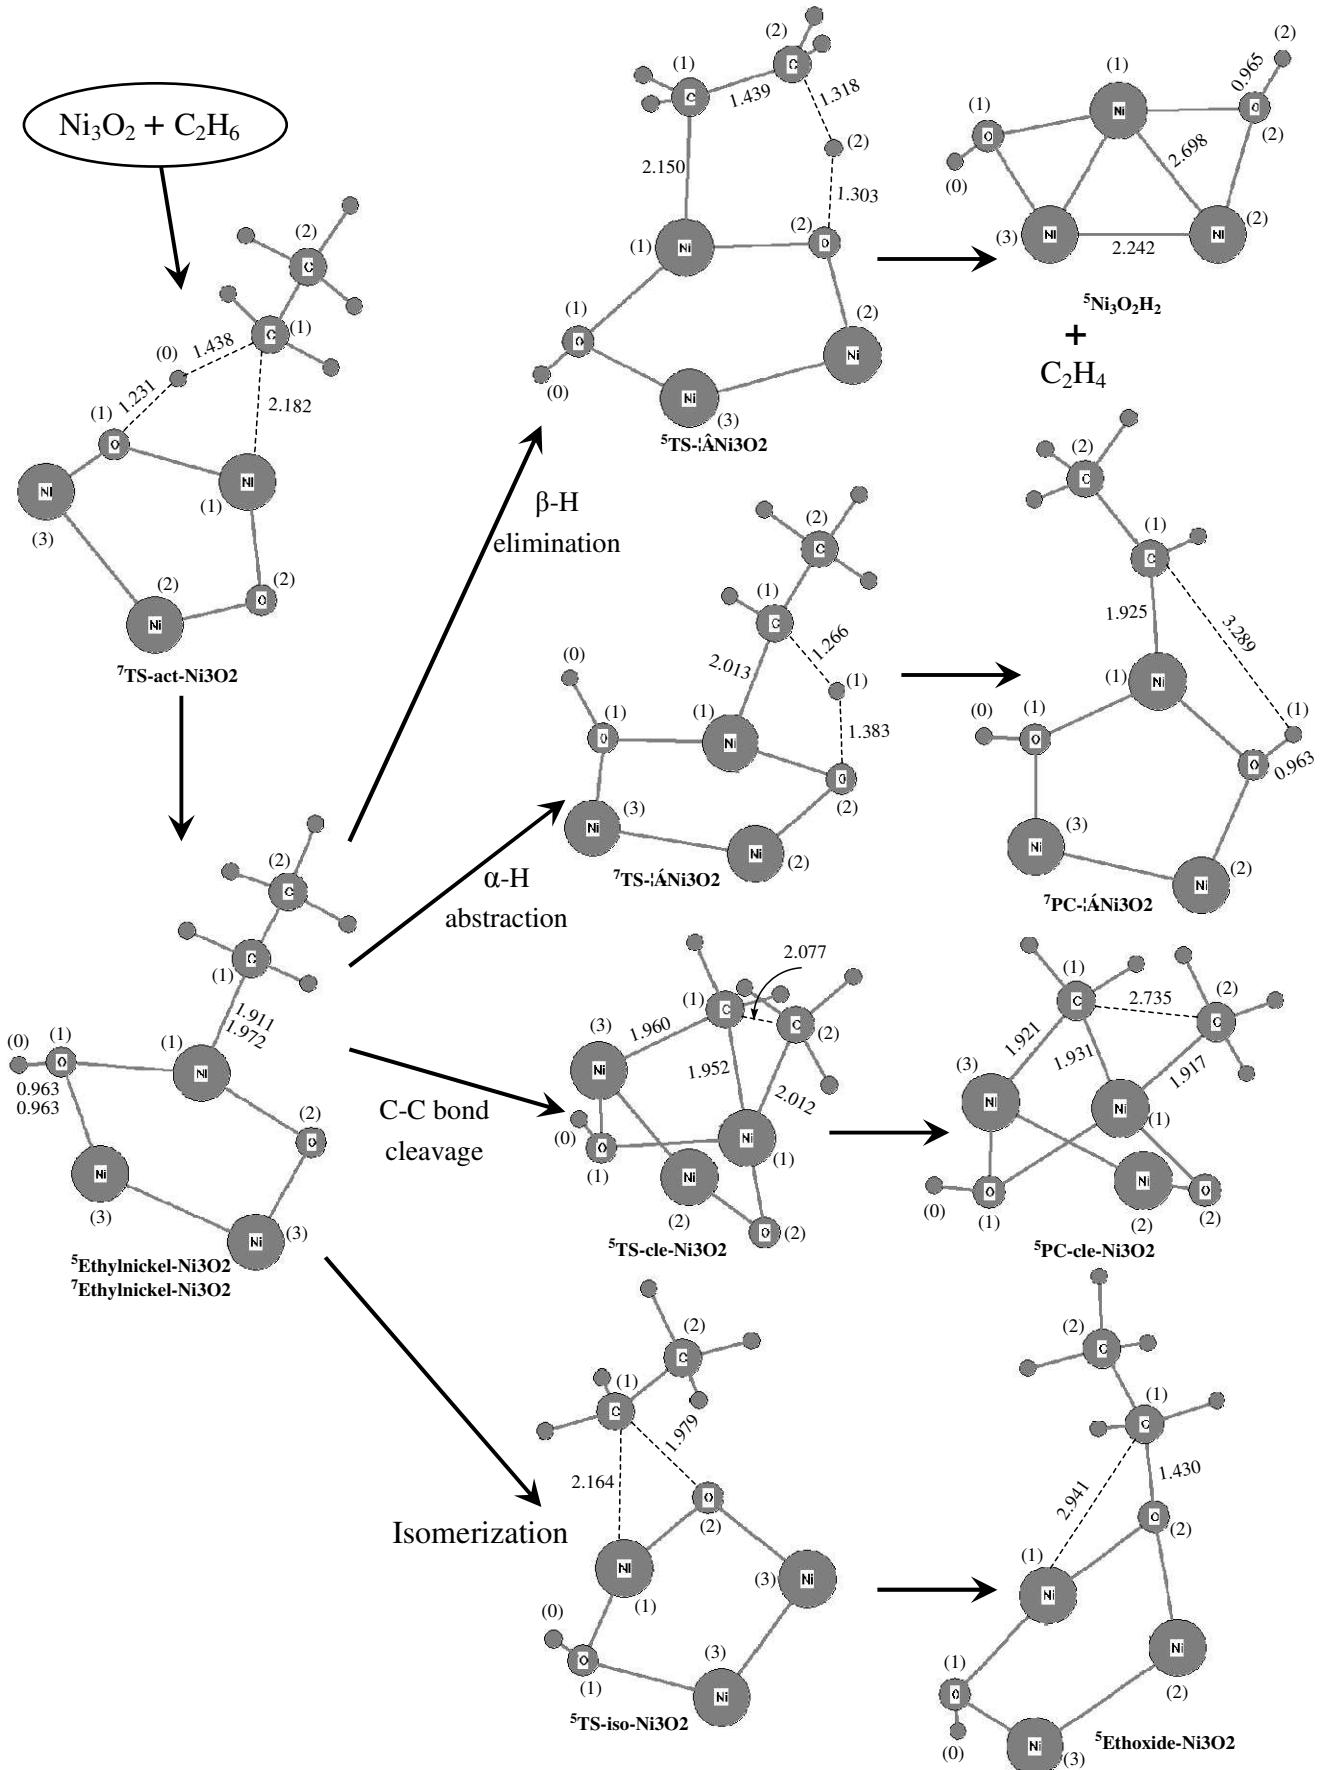

Figure 5S. Optimized geometries for the transition states, product complexes and separated products involved in the C-H bond activation step and the following four reaction pathways of **Ethylnickel-Ni₃O₂**, for C₂H₆ reacting with Ni₃O₂. Key distances are indicated in Å.

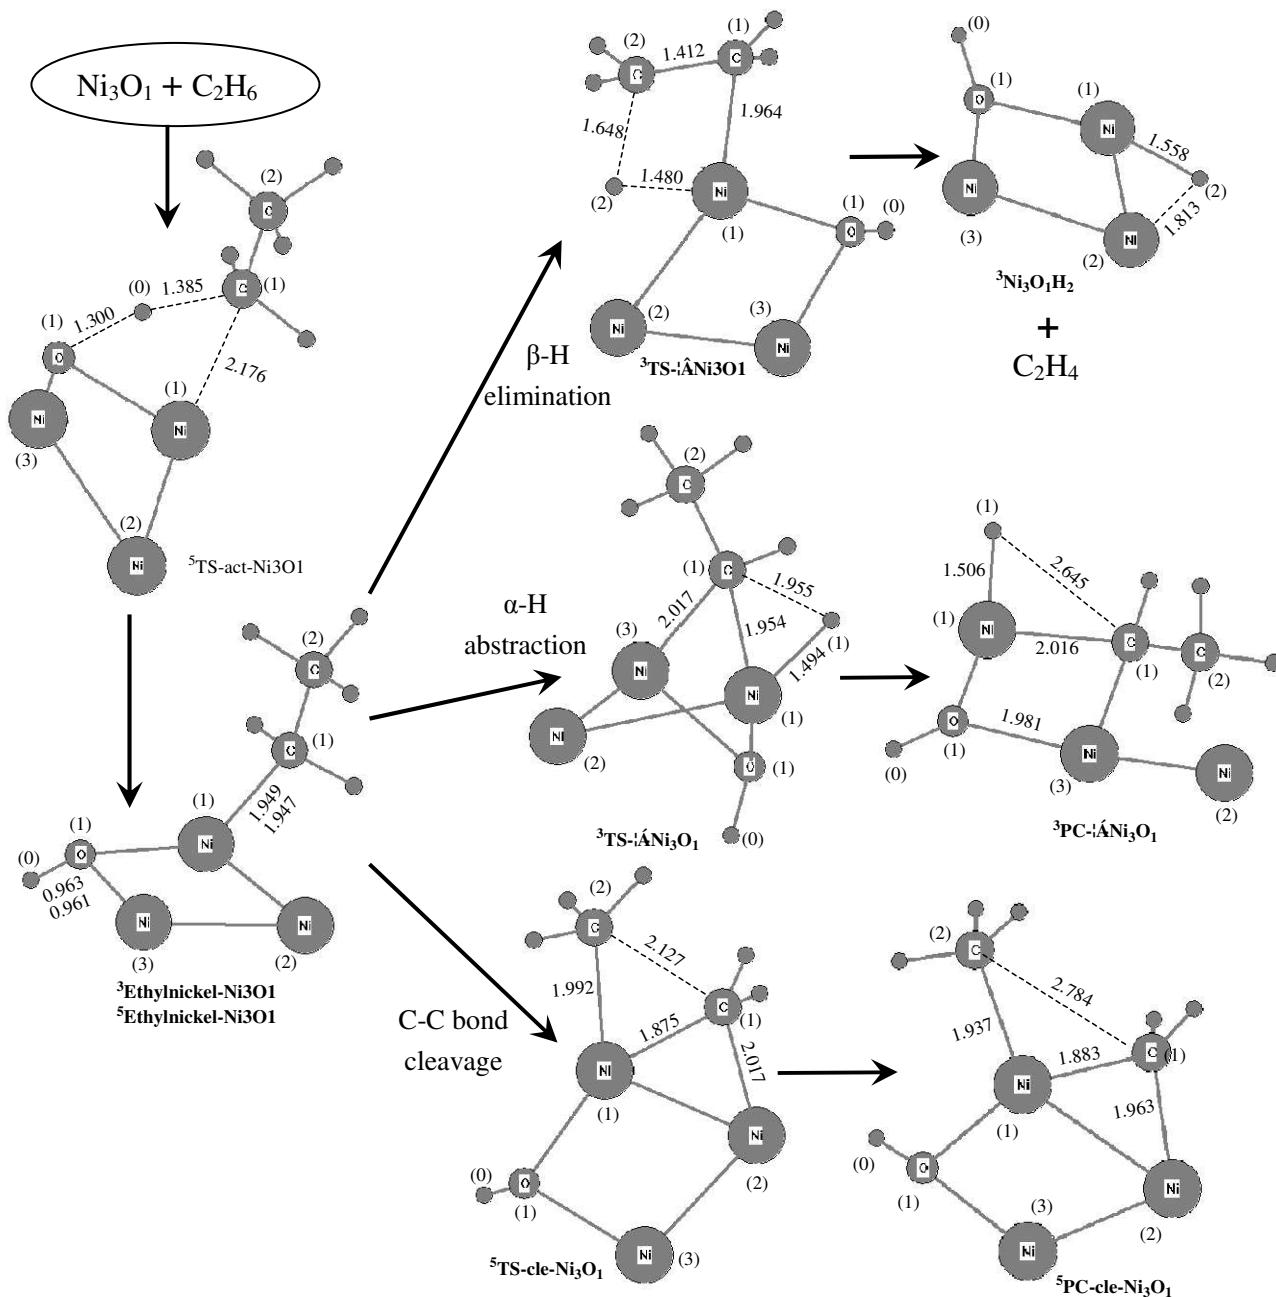

Figure 6S. Optimized geometries for the transition states, product complexes and separated products involved in the C-H bond activation step and the following three reaction pathways of **Ethylnickel-Ni₃O₁**, for C₂H₆ reacting with Ni₃O₁. Key distances are indicated in Å.

Cartesian coordinates for all the optimized structures at the B3LYP/BS1 level of theory in the manuscript. See the manuscript for the detail basis set information. The order of the species listed here is the same as the order of species appearing in the manuscript. The number in the upper-left side of a species represents its spin multiplicity.
