Number of tables: 5

Number of figures: 3

List of content in the supporting information

Information regarding the analyzed samples and their characterization

Table S1. Complete list of samples

Table S2. Set of optimized transitions

Table S3. Analytical method quality parameters

Table S4. C₆₀ and C₇₀ fullerenes concentration in the samples

Table S5. Organic carbon (OC) and soot carbon (EC) content of several chosen samples

Figure S1. Chromatograms of blanks, standards and real sample extracts.

Figure S2. Schematic transects and subsequent samples taken during 2006 and 2007 campaigns.

Information regarding correlation between fullerenes C60 and C70

Figure S3. Relationship between volumetric concentrations of fullerenes C₆₀ and C₇₀.

Information regarding the analyzed samples and their characterization

Table S1. Complete list of samples

Sample Code	Approximate sampling location	Sampling date	Air volume (m ³)	Particulate weight (g)	Initial latitude (°)	Initial longitude (°)	Final latitude (°)	Final longitude (°)
