syntaxin 1A	20907	Stx1a	40	354	14.2

<sup>a</sup>: A list of proteins with their accession number obtained from NCBI database, gene symbol, molecular weight (MW), mascot score and sequence coverage. For identification, only the proteins with the Mascot score greater than 50 and more than 2 distinct peptides were considered. All differentially expressed proteins showed the Mascot score greater than 100.

Supplemental Table 3. Peptide sequences and  $^{18}\text{O}/^{16}\text{O}$  ratios for peptides belonging to differentially expressed proteins identified in Table 1 from a representative experiment.

<b>Protein Name</b>	<b>Accession No.</b>	<b>Sequence</b>	<b>Heavy/Light</b>	<b>Average Heavy/Light</b>
