**Figure S1.** Schematic of dual-fiber electrospinning experiment. The collecting drum rotates and oscillates horizontally for random orientation and uniform distribution of the nanofibers.

**Table S1.** Limiting current measurements from accelerated lifetime testing.

Time (hours)	Limiting Current - Nafion 212 (mA/cm <sup>2</sup> )	Limiting Current - Nanofiber Composite (mA/cm <sup>2</sup> )
0	1.5	1.9
