

"Tuning the vertical phase separation in polyfluorene:fullerene blend films by polymer functionalisation"

Anselmo, Ana; Lindgren, Lars; Rysz, Jakub; Bernasik, Andrzej; Budkowski, Andrzej;
Andersson, Mats; Svensson, Krister; van Stam, Jan; Moons, Ellen

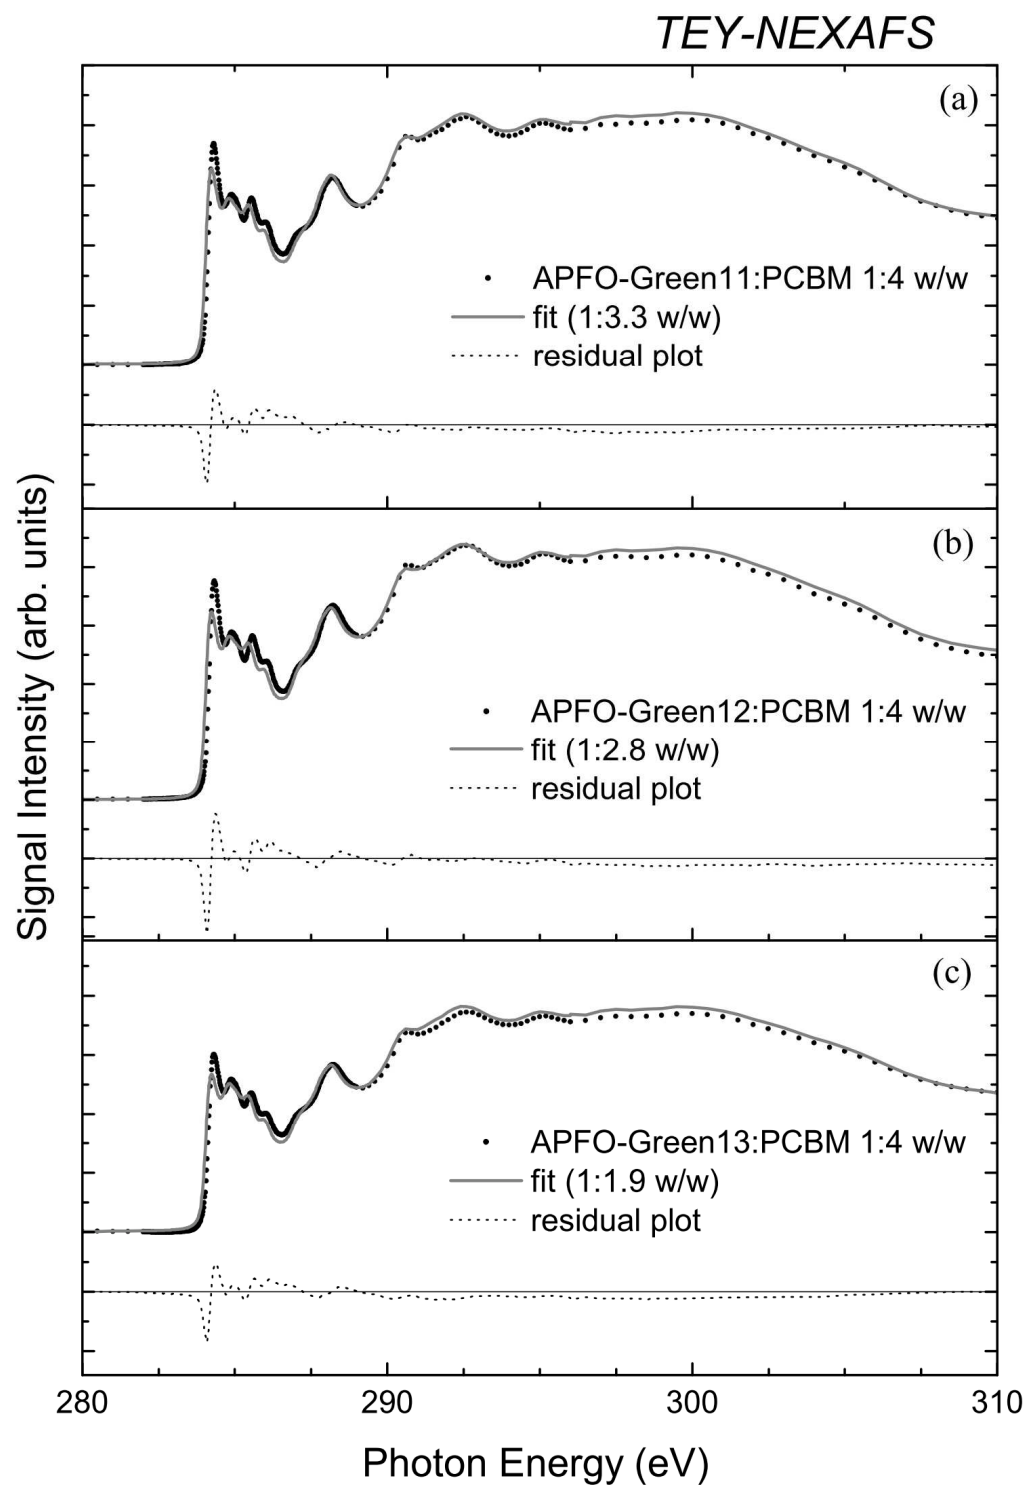

Figure S1. Carbon K-edge NEXAFS spectra measured in partial (PEY) electron yield of (a) APFO-Green11:PCBM; (b); APFO-Green12:PCBM; and (c) APFO-Green13:PCBM with the corresponding best linear combination fits and residual plots (shifted, to improve clarity).

Figure S2. Carbon K-edge NEXAFS spectra measured in total (TEY) electron yield of (a) APFO-Green11:PCBM; (b); APFO-Green12:PCBM; and (c) APFO-Green13:PCBM with the corresponding best linear combination fits and residual plots (shifted, to improve clarity).
