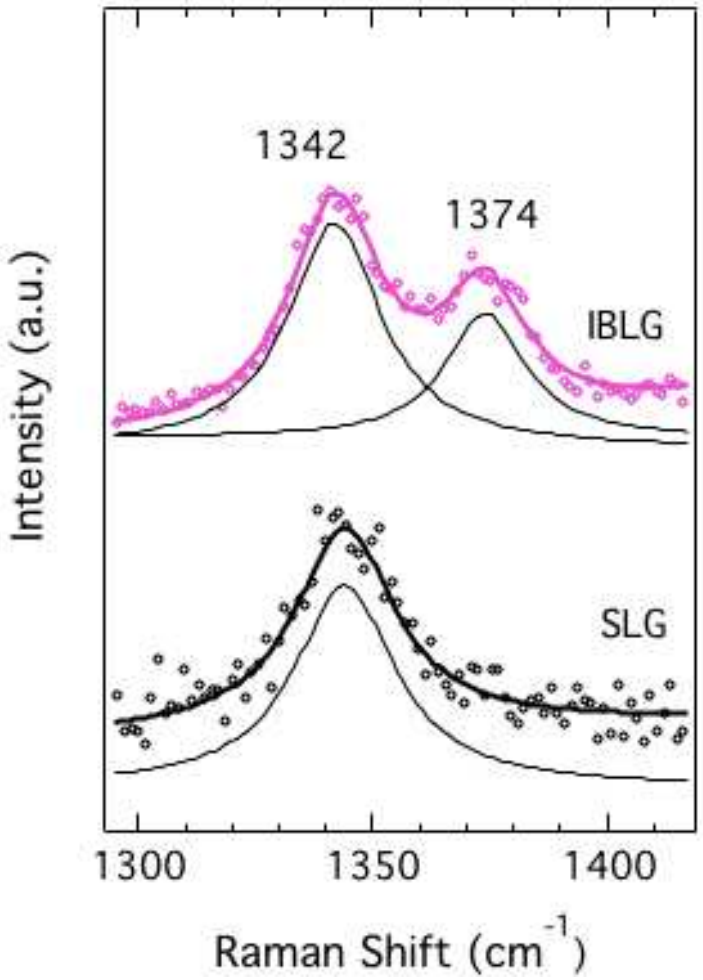

Figure S1. Raman spectra in the D band region from IBLG and SLG. The spectra were normalized by the intensity of the G band.

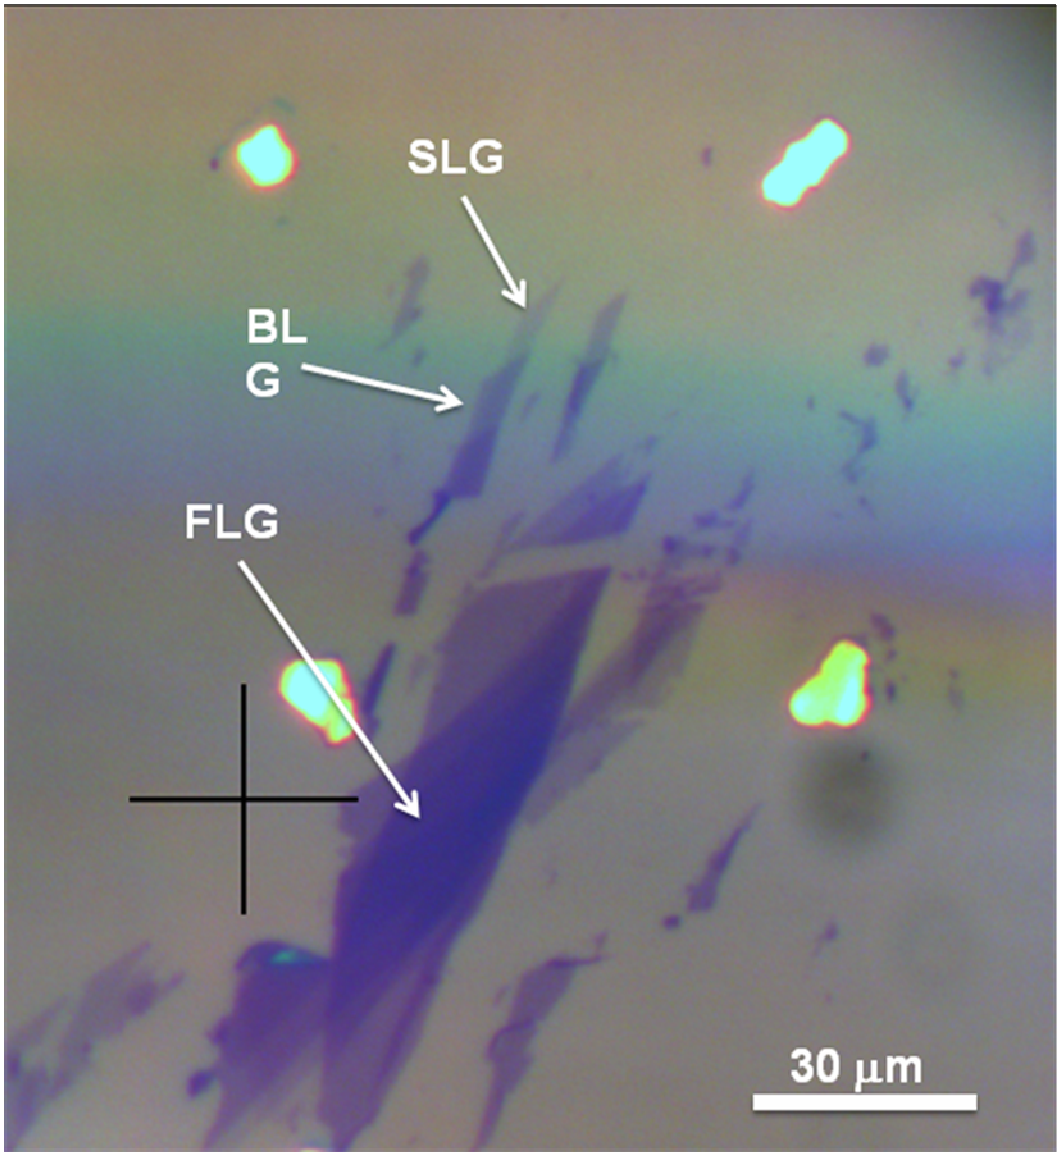

Figure S2 – Optical microscope (50 x magnification) image of graphene flakes having 1, 2, and few layer graphene on 280 nm SiO_2/Si substrate.

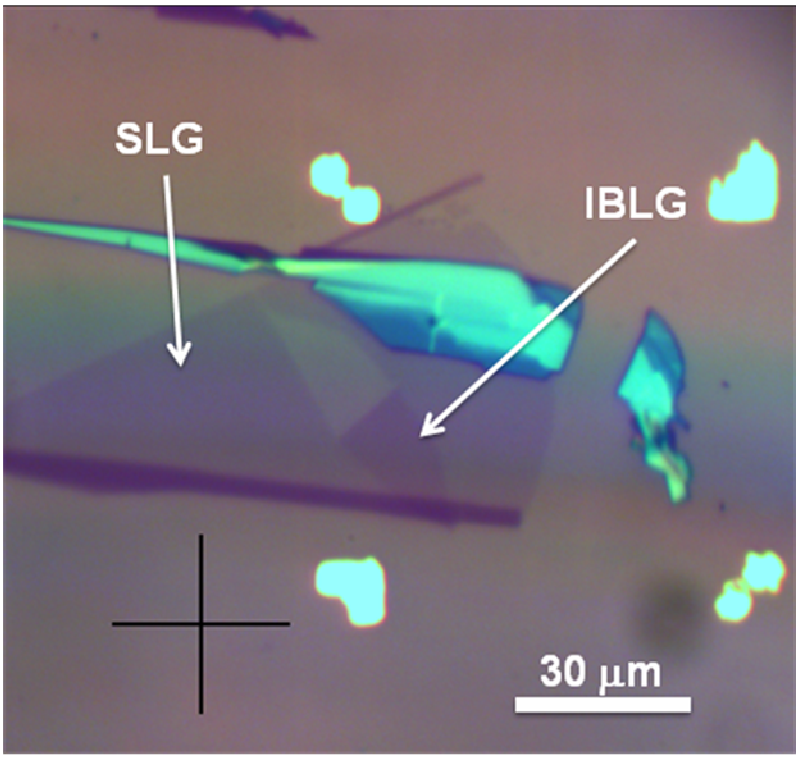

Figure S3 – Optical microscope (50 x magnification) image of a single layer graphene flake, a part of which has folded upon itself to form incommensurate bilayer graphene.
