

Supplementary table 3. Average PCCs of the hubs.

| Hub(gene symbol) | Hub(gene title)                      | Average PCCs |
|------------------|--------------------------------------|--------------|
| PSMA5            | Proteasome subunit alpha             | 0.418086     |
| CCT3             | T-complex protein 1 subunit gamma    | 0.1205       |
| PSMD9            | 26S proteasome non-ATPase regulatory | 0.415517     |
| PSMA2            | Proteasome subunit alpha type 2      | 0.514714     |
| YWHAZ            | 14-3-3 protein zeta/delta            | -0.20208     |
| AK1              | Adenylate kinase isoenzyme 1         | 0.2657       |
