Application of Solid-Phase Microextraction for *in Vivo* Laboratory and Field Sampling of Pharmaceuticals in Fish

Number of Pages (including this cover sheet): 3

Number of Figures: 2

Number of Tables : 0

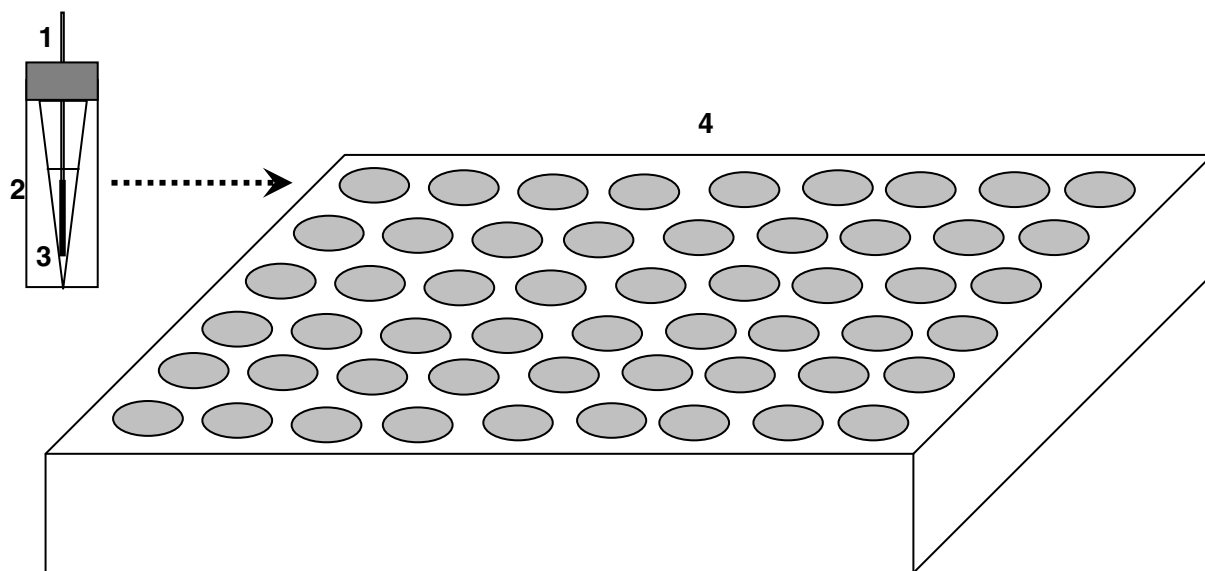

Figure S1. Desorption device for *in vivo* and field sampling: (1) SPME fiber, (2) 2-mL vial, (3) 200-μL insert, and (4) 54-vial plate.

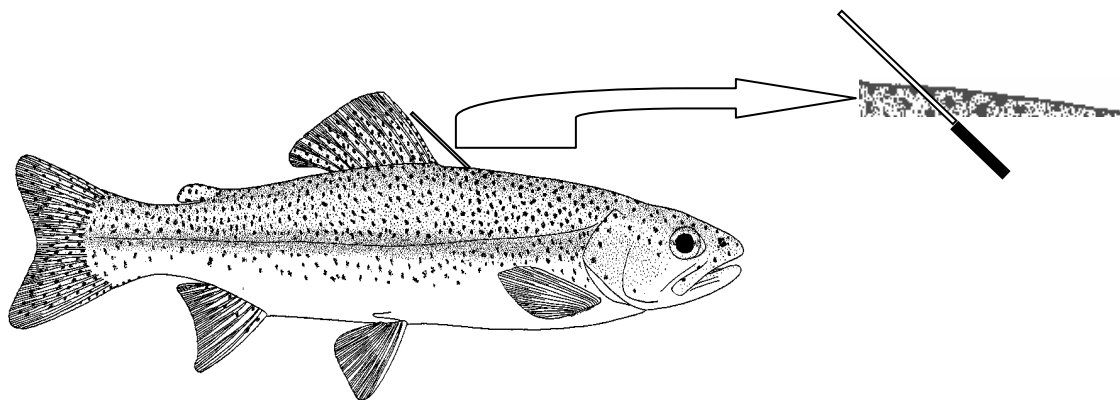

Figure S2. Location of SPME fiber used for *in vivo* sampling in the dorsal-epaxial muscle of a rainbow trout, and location of muscle sample excision.
