

Supporting Information. Distributions of D_xA_y species for chito-oligomers from DP 3 to DP 7 as a function of the average DA, and MALDI-TOF mass spectrum assignments of the series of chito-oligomers.

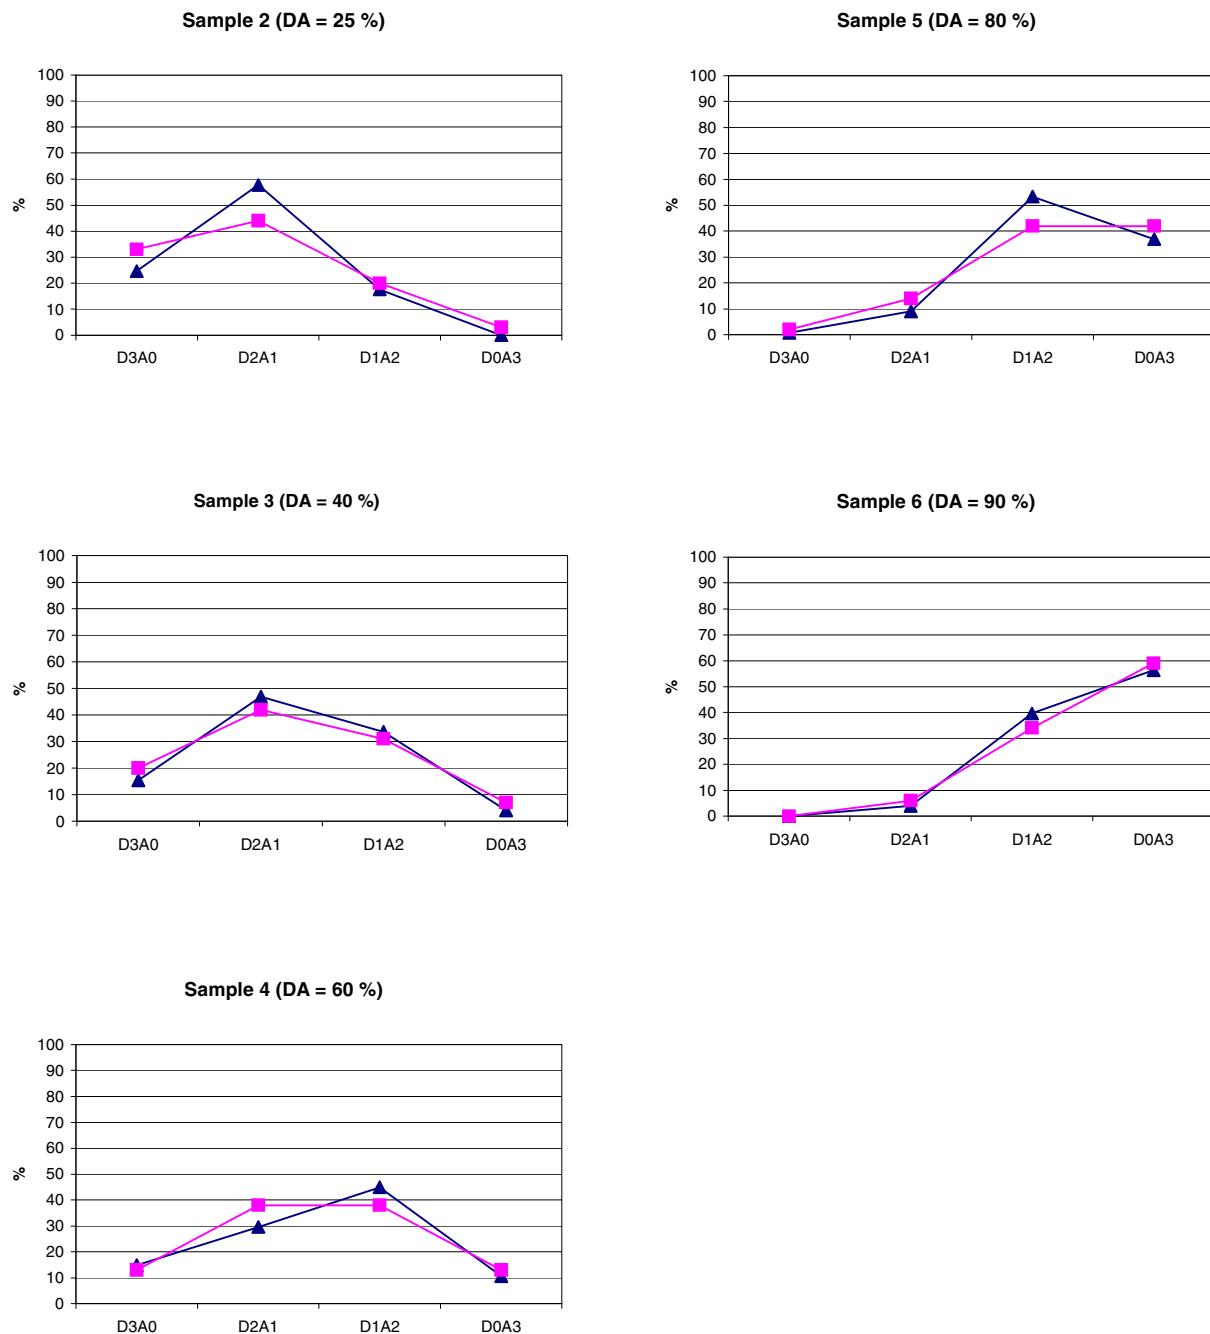

Figure 1. Distributions of D_xA_y species for chito-oligomers of DP 3 as a function of the average DA (-▲- experimental distribution from MALDI-TOF MS analysis, -■- modelling distribution, D, for GlcN and A, for GlcNAc).

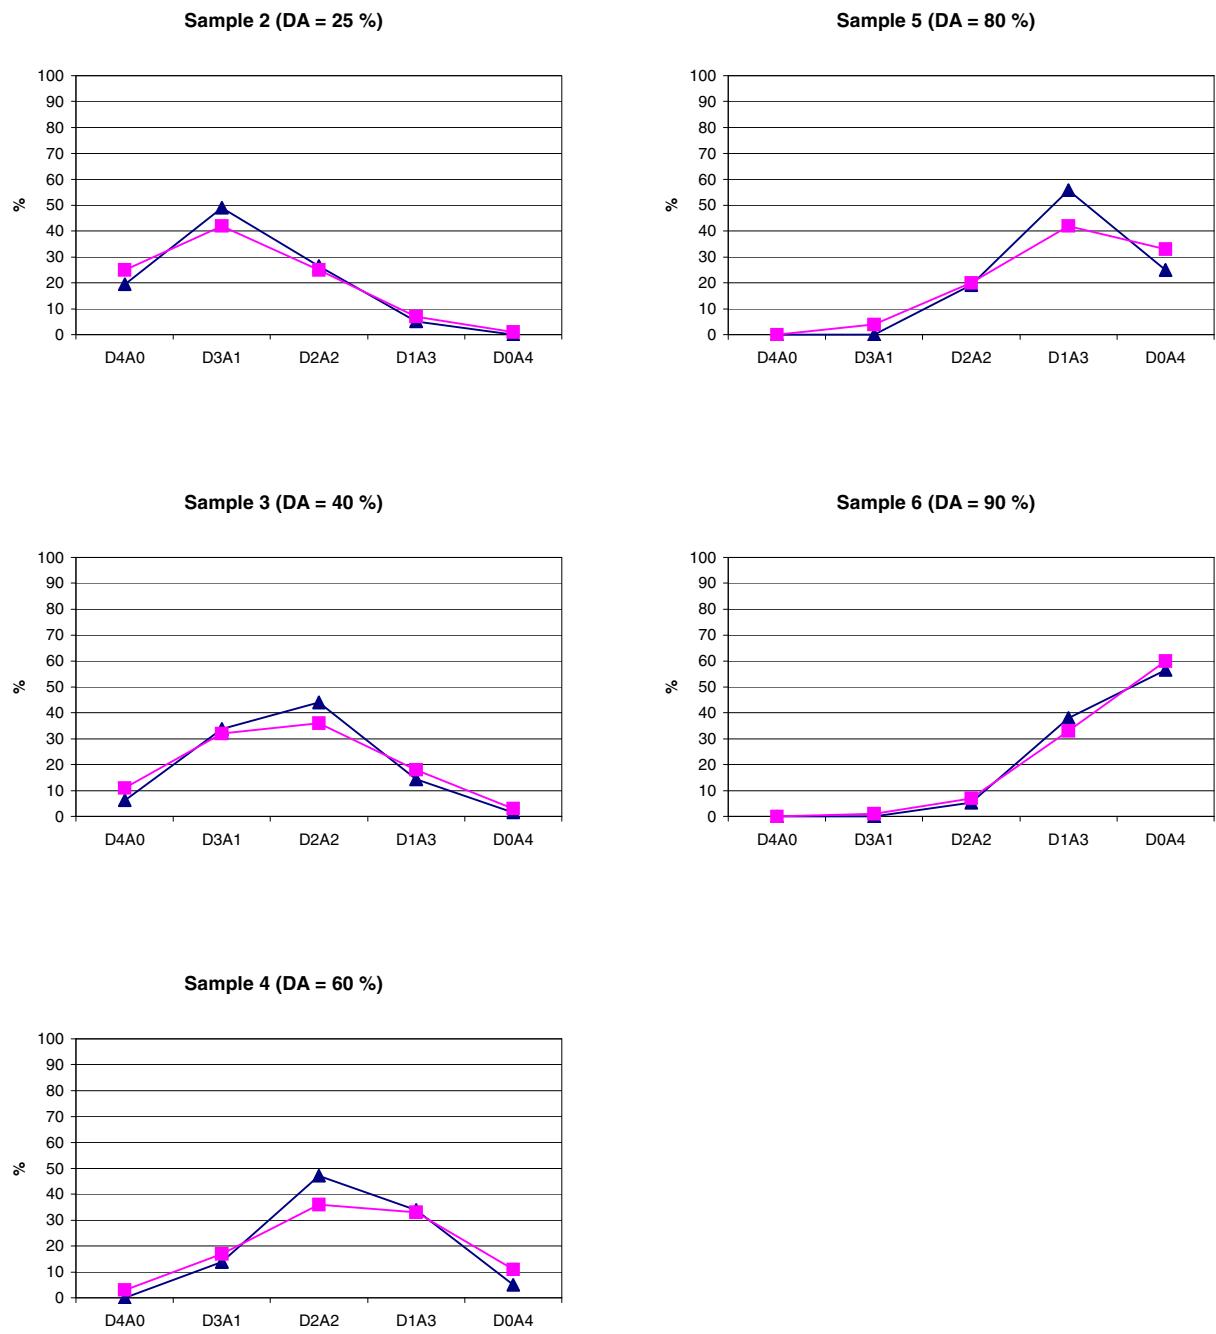

Figure 2. Distributions of D_xA_y species for chito-oligomers of DP 4 as a function of the average DA (-▲- experimental distribution from MALDI-TOF MS analysis, -■- modelling distribution, D, for GlcN and A, for GlcNAc).

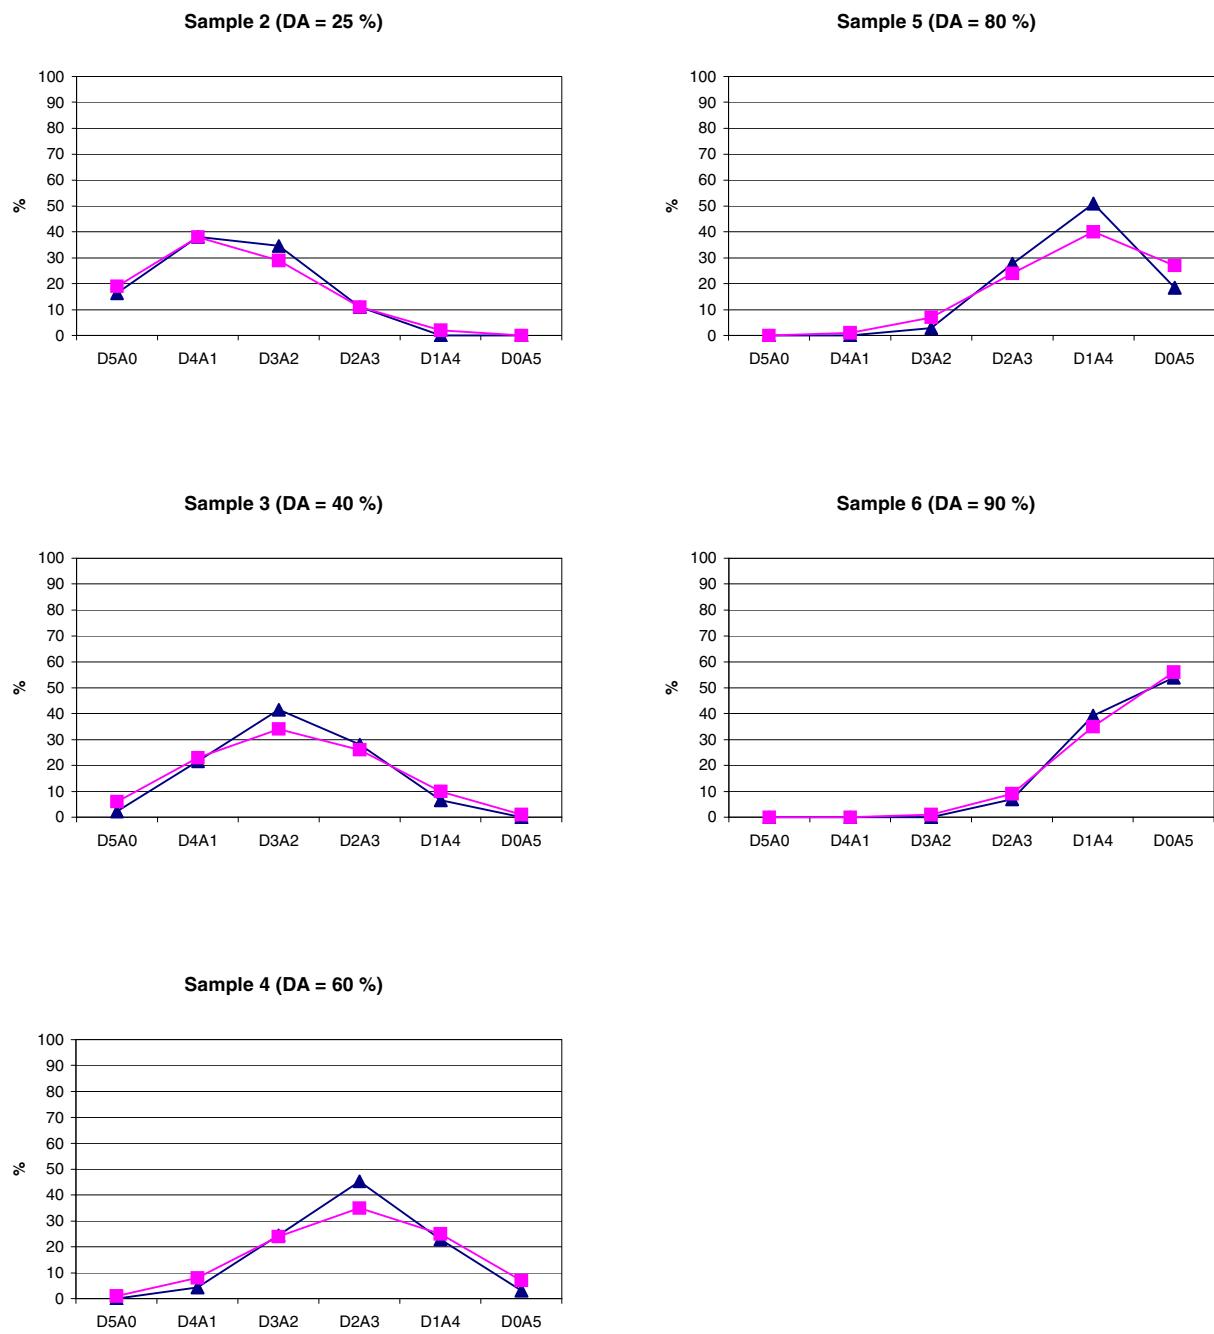

Figure 3. Distributions of D_xA_y species for chito-oligomers of DP 5 as a function of the average DA (-▲- experimental distribution from MALDI-TOF MS analysis, -■- modelling distribution, D, for GlcN and A, for GlcNAc).

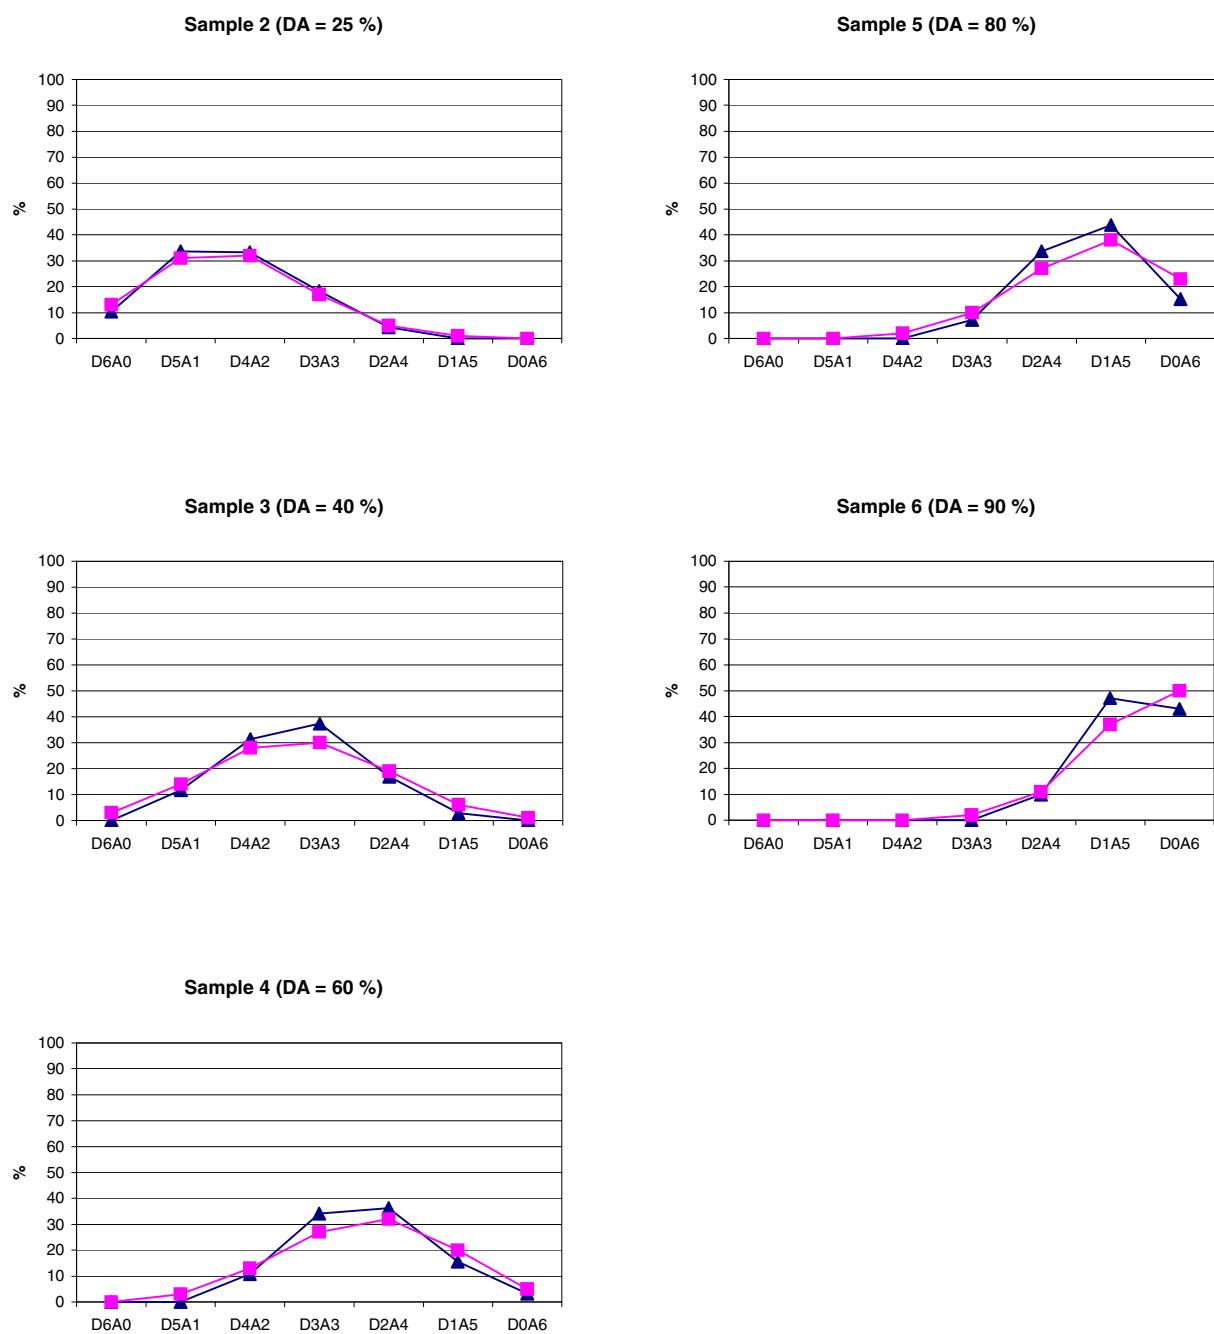

Figure 4. Distributions of D_xA_y species for chito-oligomers of DP 6 as a function of the average DA (-▲- experimental distribution from MALDI-TOF MS analysis, -■- modelling distribution, D, for GlcN and A, for GlcNAc).

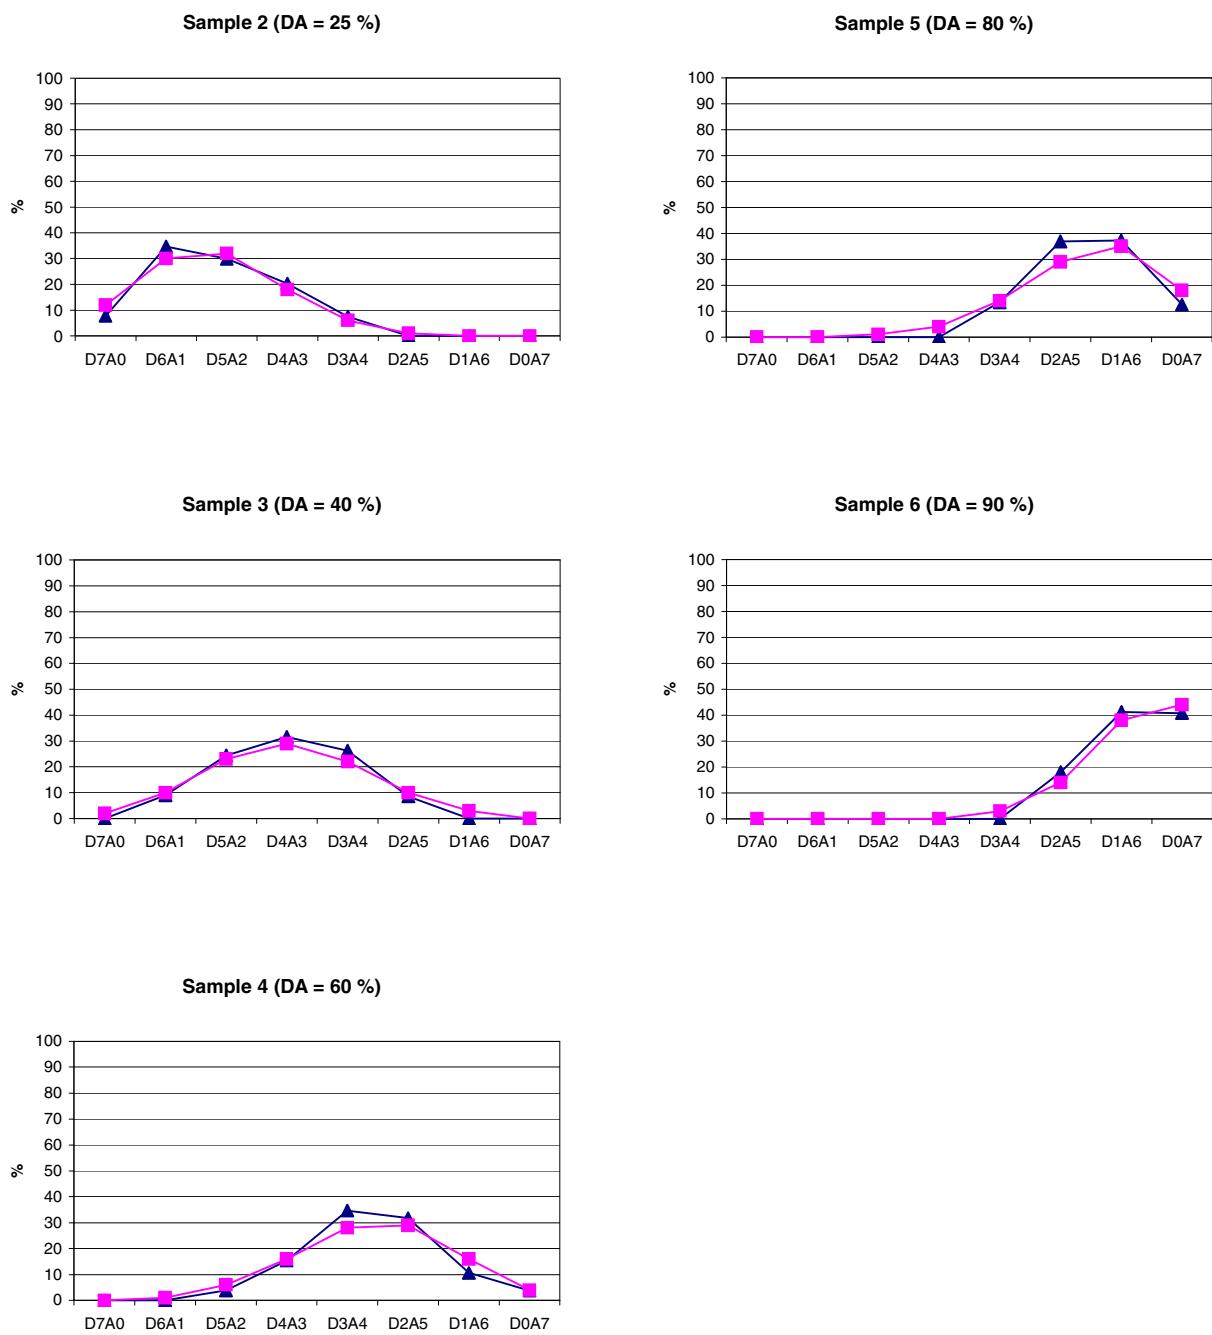

Figure 5. Distributions of $D_x A_y$ species for chito-oligomers of DP 7 as a function of the average DA (-▲- experimental distribution from MALDI-TOF MS analysis, -■- modelling distribution, D, for GlcN and A, for GlcNAc).

Table 1. Detailed MALDI-TOF mass spectrometry analyses of the series of chito-oligomers.

DP	Species ^a	DA _{th} (%) ^b	Peak assignment	theoretical mono-isotopic mass (m/z)	Sample	MALDI-TOF MS peak intensity ^c				
						2	3	4	5	6
3	D ₃ A ₀	0	[D ₃ A ₀ + H ₂ O + Na] ⁺	524.2	1474	1562	1071	104	0
