

Supporting Information

Increase of the polydispersity index of SDS/DTAB solutions upon addition of chloride salts (Figure S1); Increase in size of catanionic aggregates after the addition of sodium salts (Figure S2).

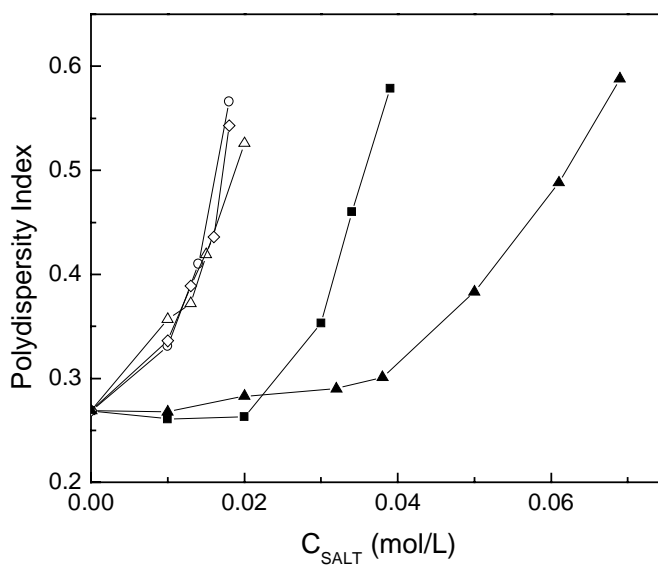

Figure S1: Increase of the polydispersity index of SDS/DTAB solutions upon addition of chloride salts: CsCl (\circ), RbCl (\diamond), KCl (\square), NaCl (\blacksquare) and LiCl (\blacktriangle).

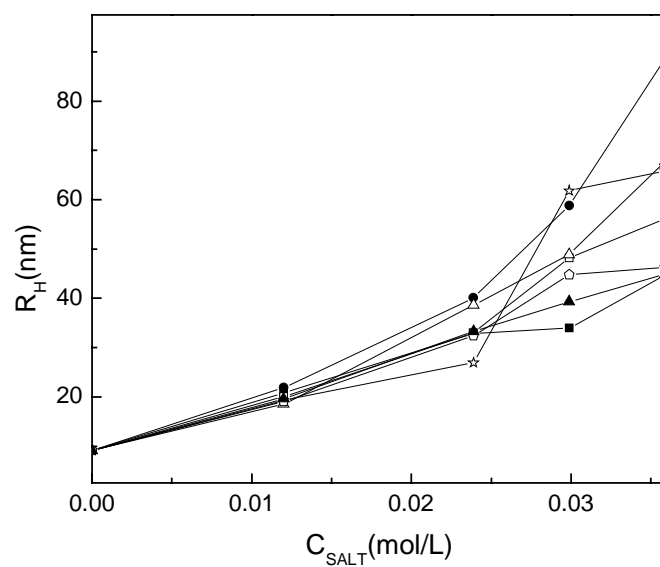

Figure S2. Increase in size of cationic aggregates after the addition of sodium salts: NaI (■), NaAc (▲), NaSCN (○), NaBr (□), NaOH (☆), NaClO₄ (◐) and NaCl (●) measured by DLS.
