Aerosol Assisted Vapor Phase Synthesis of Gallium Nitride Powder

Gary L. Wood¹, Eugene A. Pruss² and Robert T. Paine^{*2}

Department of Chemistry and Center for Micro-Engineered Materials, University of New Mexico, Albuquerque, NM 87131 and Department of Chemistry, Valdosta State University, Valdosta, Georgia 31698

Contents

- Figure S-1 TGA scan for $\text{Ga}(\text{NO}_3)_3 \cdot x\text{H}_2\text{O}$
- Figure S-2 Powder XRD for gallium oxide produced in AAVS reactor without NH_3 ,
and literature 2θ values for Ga_2O_3
- Figure S-3 SEM for gallium oxide powder from AAVS reactor
- Figure S-4 EDX for partially nitrated AAVS produced powder
- Figure S-5 Powder XRD for partially nitrated AAVS produced powder
- Figure S-6 Powder XRD of GaN obtained from AAVS powder nitridation
- Figure S-7 TEM of AAVS produced powder
- a) Low resolution
- b) High resolution
- Figure S-8 SAED of AAVS produced powder

- a) single crystal, [001] pattern
- b) single crystal, [100] pattern
- c) nanocrystal agglomerate
