^a Structures calculated at B3LYP/6-31+G(d) level of theory. Important structures are presented in Table S3.

^b Electronic energy is calculated as a single point energy at the CCSD(T)/aug-cc-pVDZ level of theory.

^c Zero-point energy is calculated from the harmonic frequencies which are determined at the B3LYP/6-31+G(d) level of theory.

^d Relative energy calculations include zero-point energies which have been corrected using the empirical scaling factor of 0.9804.²

Table S2. Electronic energies calculated at the CCSD(T)/aug-cc-pVDZ//B3LYP/6-31+G(d) level of theory, zero-point energies, relative energies and imaginary frequencies for the $\text{NC}^- + \text{CH}_3\text{OOH}$ potential energy surface. All calculations utilized the GAUSSIAN98 suite of programs.¹
