MATERIAL

## Supporting Information

"Three types of adsorptions of nitric oxide on the MgO surface"  
by Yasunori Yanagisawa, Kei Kuramoto and Shinichi Yamabe

== Cartesian coordinates, frequencies and other key information  
obtained by *ab initio* calculations of GAUSSIAN94 ==

Coordinates are in Angstrom. Frequencies are in  $\text{cm}^{-1}$ .

(1) The geometry of  $(\text{MgO})_5\text{NO}$  in Figure 3
