

“Triangular Nanoframes Made of Gold and Silver”

Gabriella S. Métraux, Yunwei Charles Cao, Rongchao Jin, Chad A. Mirkin

Supporting Information:

Figure 1. Silver prisms with H_2PtCl_6 (Pt:Ag = 1:4). The face-selective etching process observed in the case of HAuCl_4 does not appear to take place with H_2PtCl_6 .

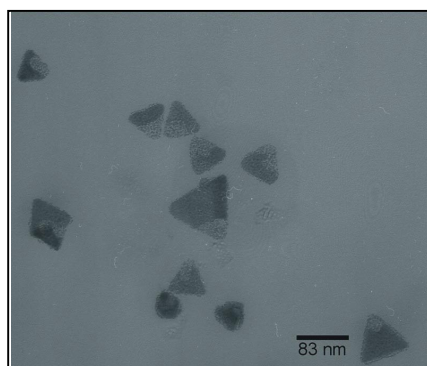

Figure 2. TEM-EDX spectra of nanoframe colloid after (A) one cycle of HAuCl_4 /L-ascorbic acid and (B) three cycles of HAuCl_4 /L-ascorbic acid.
